

Language Tree Online

# Leveled Standards-Based English Language Development

FOR MIDDLE AND HIGH SCHOOL

## Give Your English Learners the Skills Needed to Succeed

Our mission at Language Tree Online is to help close the opportunity gap between English learners and their peers. We help educators identify the exact language areas where students need more support. This is followed by scaffolded digital instruction and downloadable teacher resources based on the latest standards. With this approach, English learners gain confidence as they improve proficiency across all four domains of language.

The Language Tree Online resources can be used as a supplemental tool, or as the foundation for your EL curriculum. In addition to use during the academic year, they can be used for summer intervention and other extended learning programs to overcome learning loss.

*"The Language Tree Online program has been such an amazing resource for both myself and my students. There were multiple options when it came to learning. Students were able to work independently at their own pace. I was also able to easily check on student progress through the program."*

— ELA/ELD Teacher at  
large California School District

# Supporting the Continuum of English Language Acquisition

The Language Tree Online Comprehensive ELD Program is a complete, standards-based online curriculum for English learners in grades 6-12. This program is designed to help students make rapid progress in all four domains of language acquisition.

This program is recommended for classes or districts with English learners who span a range of proficiency levels. Educators have the flexibility to assign applicable lesson modules from the Newcomer, ELD 1, or ELD 2 programs based on the individual needs of their students.

## Comprehensive ELD Program for All Levels of English Learners

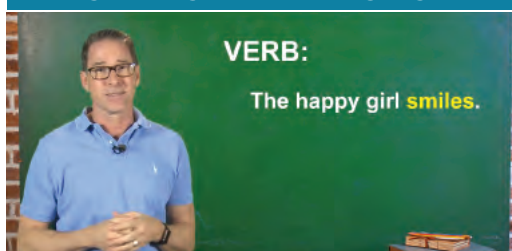

### Newcomers

For recently arrived students, our Newcomers module provides acculturation support and builds language competency for students with limited transferable language skills.

- ✓ Helps newcomers feel comfortable and prepared in their new school environment by informing them of classroom expectations, school resources, and ways to get involved in school life
- ✓ Vocabulary builders and highly scaffolded instruction help early beginners access ELD Level 1 lessons

### ELD 1: Beginning and Emerging

ELD 1 is an English language development program for beginner level learners in the secondary grades. With this program, educators can:

- ✓ Gain insight into their students' language gaps to deliver more personalized instruction
- ✓ Accelerate English language proficiency progress through lessons aligned with the latest ELD standards
- ✓ Provide opportunities for collaborative listening, speaking and writing

### ELD 2: Intermediate and LTELs

The ELD 2 program prepares intermediate level and long-term English learners (LTELs) for re-designation. It features:

- ✓ Standards-aligned assessments that precisely identify the language gaps that impede progress
- ✓ Language lessons embedded with critical subject matter (Social Studies, Language Arts, Math and Sciences) content to help students unpack academic language
- ✓ Opportunities for collaborative listening, speaking and writing

## Aligned with the Latest English Language Development Standards

Developed by a National Board-certified ELD educator with almost three decades of classroom experience, our assessments and curriculum follow the latest English language proficiency standards, including California 2012, WIDA 2020, New York Next Gen ELA, Louisiana, Arizona, and Texas ELPS.

## Designed for Secondary Grade Learners

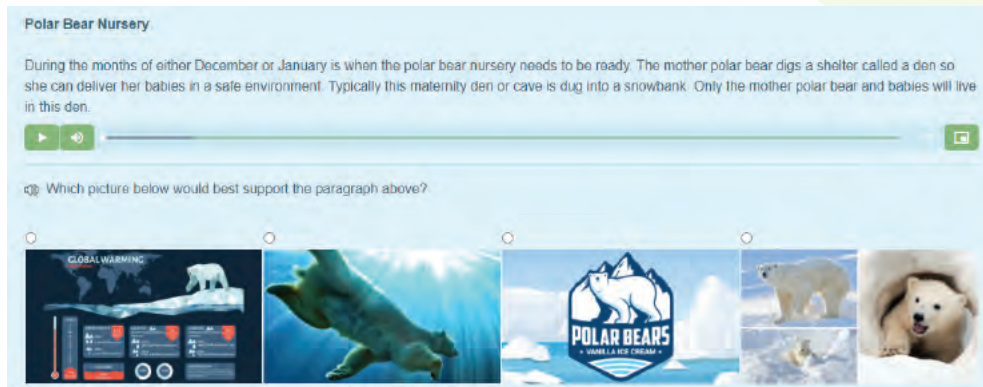

English learners in the secondary grades are not the same as elementary age learners. To help older learners stay engaged, we feature age-appropriate content together with realistic peer-to-peer interactions.

## Culturally-Responsive Pedagogy

Our solution includes resources that reflect aspects of the language learners' identities. We present references and images from a variety of cultural backgrounds. In addition, many of our lessons connect with real-world issues to help English learners develop a better understanding of the world around them.

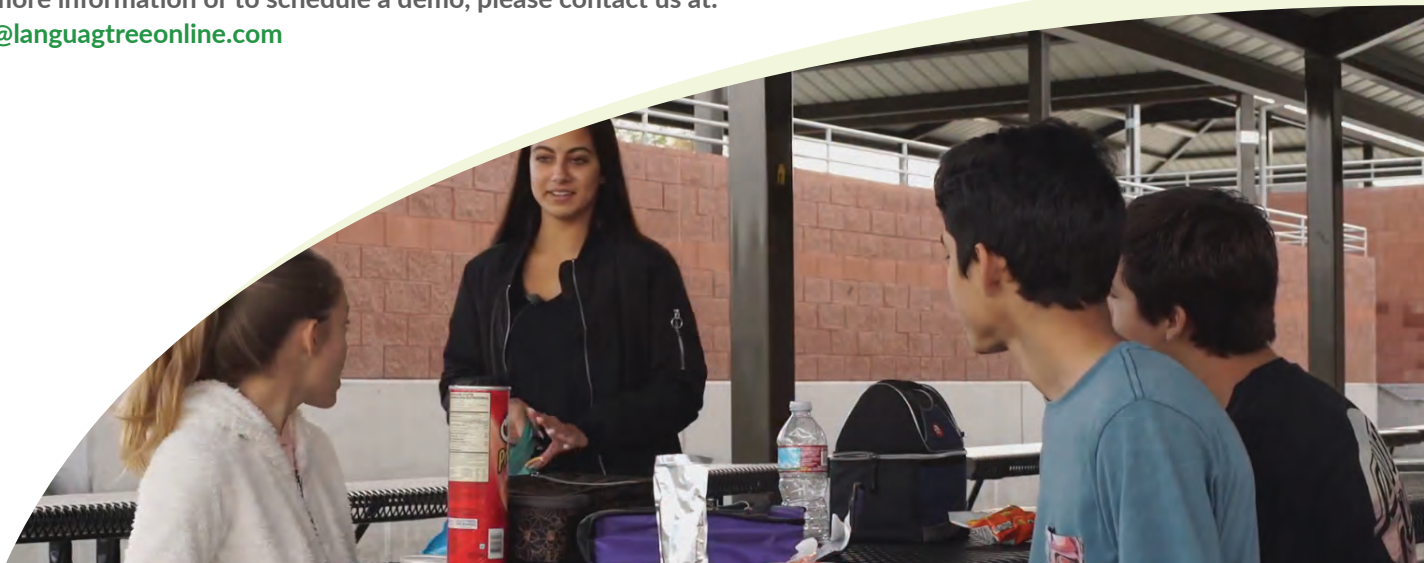

## Multi-Sensory Teaching and Exercises

We combine video instruction with fun, interactive features such as quizzes, self-recording and writing exercises. Video, images and audio serve not only to make the learning experience appealing, they also help ensure equity of access to the content.

## Comprehensive Program Includes All Resources and Tools Teachers Need

Our robust digital curriculum supports hybrid instruction and each lasts a full academic year or more when used with fidelity. Both the **ELD 1** and **ELD 2** programs include standards-based entry/exit assessments to provide valuable formative and summative data, along with standards-based lesson modules. In addition, our **Newcomers Module** includes a unique acculturation component to address the socio-emotional needs of newcomers.

The online lessons are accompanied by downloadable instructional routines for teachers and additional practice assignments for homework or review.
